## Skills

- Java
- Spring Boot
- RESTful APIs
- Postman
- Hibernate
- Groovy
- Grails
- PostgreSQL
- MySQL
- Mongo DB
- Azure
- Angular 8
- Jquery
- Javascript
- HTML
- CSS
- EJS
- Git
- SVN
- Tableau
- Eclipse
- Spring Tool Suite
- NetBeans

## Professional Summary

- 6.4+ years of experience in the IT industry in analysis, design, development and implementation areas in **Java, Spring Boot, Hibernate, Javascript, JQuery, HTML, CSS, Angular 8.0, MEAN Stack, Bootstrap, Git, RESTful APIs, Azure, Tableau.**
- Expertise in databases like **PostgreSQL, MySQL, MongoDB.**
- Good working knowledge of **IDE** tools like **NetBeans, STS and Eclipse**

## Work Experience

Healthcare Workforce Logistics, India.	09/2017 - Present
Sigma Info Solutions Pvt Ltd., India.	06/2014 - 08/2017

## Education

University of Bradford, United Kingdom.	2007- 2008
M.Sc in Software Engineering [Grade: Distinction]	
M.I.E.T Engineering College. India.	2000- 2004
B.E in Computer Science and Engineering [Grade: First Class]	

## Projects

Healthcare Workforce Logistics	Sep-2017 to Till Date
Client Side Technologies :	Angular, HTML, CSS, JQuery, JavaScript, Bootstrap, EJS, NodeJs.
Environment :	Java, Spring Boot, Hibernate, PostgreSQL, REST API,Postman.
Reporting Tool :	Tableau.

*Project Description:*

Healthcare Workforce Logistics (HWL) is designed to support healthcare delivery organizations in a vendor-neutral environment. It is a recruitment tools and real-time market analytics that accelerate the engagement process for both employers and job seekers within the healthcare market. Customized program managed workforce solutions designed to meet the demands of Locum, Nursing, Allied and Non-clinical professional services.

*Responsibilities:*

- Responsible for developing web application with REST API using Spring Boot.
- Responsible for creating API documentation using SWAGGER.
- Responsible for creating responsive web application using Angular, CSS, HTML, Javascript & JQuery.
- Responsible for managing the source code in GIT repository.

- Responsible for co-ordinating DEVOPS to create the build pipeline and release pipeline using Azure cloud platform.
- Responsible for integrating the GIT source code with Azure DEVOPS pipeline.
- Have excellent knowledge in designing the web application using Accessibility standards WCAG 2.1 standards.
- Maximized applications' efficiency, data quality, scope, operability, and flexibility
- Responsible for writing Server-side rendering using EJS/Node.js platform.
- Responsible for creating the re-usable component using Router concepts in front end applications.
- Have excellent knowledge in creating the MVC design pattern on front end application development.
- Developed full-stack web applications which processed, analyzed, and rendered data visually.
- Liaised with back end developers, front end developers, quality assurance testers, Content designer, UX designer and Agile scrum master as needed.
- Managed time-sensitive updates, including content changes and database upgrades.
- Planned, wrote, and debugged web applications and software with complete accuracy.
- Have excellent knowledge in creating the web services API – using JAVA and spring boot.
- Have created automated unit testing using JEST tool in node.js front end applications.
- Have good experience in creating web components using pagination, sorting and filtering.

## Commercial Surety Bond Agency

May-2016 to Aug-2017

Client Side Technologies : HTML, CSS, JQuery, JavaScript, Bootstrap, AngularJS, NodeJS.  
Environment : Java, Spring Boot, Hibernate, MySQL, Tomcat 6.
